RHendricks@horrangi.com

950 Blanding Blvd Suite 23-181, Orange Park, FL 32065-5910

Company Overview

Horrangi Business Solutions LLC (HBS) is a Service-Disabled Veteran-Owned Small Business focused on delivering commercial technology, cybersecurity, software licensing, AI-enabled solutions, training, and modernization support to federal customers.

HBS provides technology products and services primarily to Department of Defense and federal civilian customers, with emphasis on enterprise software resale, OEM licensing, Microsoft solutions, cybersecurity software, AI/ML platforms, instructor services, technical training, curriculum development, assessments, business automation, enterprise modernization, cloud migration, and data analytics. The company is positioned as a mission-focused technology partner and trusted advisor rather than a general staff augmentation firm, reflecting a deliberate 2026 strategy to prioritize scalable, higher-margin offerings and lower labor risk.

Core Competencies

- Enterprise software resale and OEM licensing, including commercial software, subscription management, renewals, and partner-led solution delivery.
- Cybersecurity solutions, including assessment support, compliance-oriented modernization, risk reduction, vulnerability management, identity-related capabilities, and commercial security software alignment.
- Microsoft ecosystem support, including licensing, cloud-related modernization, Microsoft solutions, and government purchasing support.
- Instructor services, course delivery, curriculum development, and assessment services for technical and mission support environments.

Market Differentiators

- Led by Reginald A. Hendricks, an experienced IT and project management leader with a Top Secret clearance, a PMP certification, a CompTIA Security+ certification, and decades of military and defense-related experience across Navy, healthcare, and enterprise IT environments.
- Deep mission understanding from a 20-year Navy career and extensive leadership in defense and federal healthcare settings, including project, portfolio, and site leadership roles supporting Navy Medicine and enterprise network programs.
- Proven ability to execute in high-demand operational environments, with prior leadership over large-scale IT modernization, service desk, infrastructure, virtual health, and software-related initiatives.

Certifications and Credentials
