

Horrangi Business Solutions, LLC

IT and management consulting for federal health and defense missions — turning complex operational data into decisions leadership can act on.

◆ SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS (SDVOSB)

SPREADSHEET TRACKER → POWER BI DASHBOARD → DECISION

HBS makes program status legible: the same source data, rebuilt into readiness views executives can read in the time it takes to brief a slide.

— WHO WE ARE

Horrangi Business Solutions (HBS) is a Service-Disabled Veteran-Owned Small Business delivering **health IT, data visualization, and program management** to federal agencies and the primes who serve them. Named for the Korean word for **tiger**, HBS brings focus, speed, and disciplined execution — principal-led delivery with low overhead and no learning curve on the mission.

— CORE COMPETENCIES

- ◆ **Health IT & EHR Modernization** — enterprise EHR migration, deployment, and sustainment support, including MHS GENESIS environments
- ◆ **Data Visualization & Analytics** — Power BI dashboards, deployment-readiness reporting, and executive decision support
- ◆ **Program & Project Management** — PMI-aligned planning, tracking, and risk management for high-visibility rollouts
- ◆ **IT Systems Design & Integration** — requirements, systems design, and data architecture
- ◆ **Management & Operations Consulting** — process, reporting, and operational-readiness improvement

— DIFFERENTIATORS

- ▶ **SDVOSB set-aside eligibility** that complements 8(a) and HUBZone primes — a certification lane teams can pursue with HBS on federal health and IT work
- ▶ **Hands-on DoD enterprise-EHR experience** — direct MHS GENESIS migration support, not adjacent commercial health IT
- ▶ **Data-to-decision method** — a repeatable practice for converting fragmented trackers into readiness dashboards leadership actually uses
- ▶ **Northeast Florida presence** — ready for same-day on-site support across the region's federal health and IT installations

— PAST PERFORMANCE

Defense Health Agency (DHA)

MHS GENESIS ENTERPRISE EHR MIGRATION

Supported the migration from legacy **AHLTA** and **Essentris** systems to the **MHS GENESIS** enterprise EHR. Consolidated fragmented Excel deployment trackers into unified **Power BI dashboards**, giving program leadership at-a-glance visibility into site readiness, hardware status, and cutover milestones across multiple military treatment facilities — accelerating executive decision-making during a complex, high-visibility rollout.

— IDEAL TEAMING FIT

HBS is built to strengthen a prime's bid: an **SDVOSB** partner that adds set-aside eligibility, genuine **DoD health IT** past performance, and a **data-visualization capability** that makes any solution easier to explain and easier to run. Bring us in during solution development, not after award.
